

Rejoining Management Module - Requirement Document

1. Module Name

Rejoining Management Module

2. Purpose

This module allows employees to submit a rejoining request after returning from an extended leave period. The system will route the request through the approval workflow and update the employee status accordingly.

3. Business Requirement

When an employee remains on approved leave for a long duration (typically 15 days or more), the organization may require a formal rejoining process before attendance and payroll are resumed.

4. User Roles

Employee

- Submit Rejoining Request
- Upload supporting documents
- View request status

Reporting Manager

- Review rejoining request
- Approve or reject request
- Add remarks

HR

- Final approval
- Activate employee status
- Verify documents
